 **BrowXenna**

BROW
WAXING
SYSTEM

BROW WAXING SYSTEM by **BrowXenna®** is care and depilation in one set.

The SPA-series includes luxury wax and care products with natural oils. SPA-depilation with oil is the most gentle and safe way to remove hairs.

BrowXenna® wax is created in Italy based on the most modern biotechnologies of painless hair removal. The system was developed by **BrowXenna®** technologists specially for professional hair removal on sensitive facial areas.

Perfect SPA eyebrows correction is the goal of the new depilation system **BROW WAXING SYSTEM** by **BrowXenna®**.

BROW WAXING SYSTEM by BrowXenna® is

1. Cleaning
2. Skin protection
3. Waxing treatment
4. Nutrition and care
5. Workplace care

1

Pre-waxing lotion **BrowXenna®**

Aloe, menthol, panthenol, and betaine extracts-based lotion for the perfect preparation of skin and hair for wax correction. It actively removes persistent make-up and skin impurities, degreases and disinfects the skin, promotes easy wax application. Due to the concentration of natural components in the composition, it prevents irritation and reduces pain, nourishes and protects the skin from any damage.

2

Pre-waxing oil
BrowXenna®

BrowXenna® oil creates the magic of the SPA depilation ritual. The oil is applied to the skin before contact with wax to create double protection against damage, stickiness, pain, and irritation. The formula based on orange and coconut extract additionally nourishes and regenerates the skin, has antiseptic properties and soothes. With **BrowXenna®** oil, the client is immersed in a relaxing atmosphere of aromatherapy and the eyebrow treatment becomes a real pleasure.

Wax BrowXenna®

Hypoallergenic wax for painless waxing of complex sensitive facial areas — the best* professional wax from BrowXenna®. Due to the titanium dioxide in its composition, it is exceptionally tightly adhered to the hairs and removes rigid, thin and short hairs from 1 mm at the first time. Maximum comfort for the master — it melts at 40 °C and eliminates the possibility of burning. The liquid elastic texture of the melted wax cures instantly when applied and is easily removed from the skin, leaving no traces.

*Based on the selection of professional masters from the BrowXenna® team.

Removes first time fluffy, thin, rigid and even new short hairs from 1 mm

Solidify immediately

Contacts only with the hairs, without damaging the skin

Safe for the most sensitive skin

Does not tear, crumble, crack or flow in the process

Does not leave sticky marks

The elastic creamy texture is convenient for masters of any level

It is applied by or against hair growth

3

Post-waxing oil
BrowXenna®

BrowXenna® oil for the skin treatment for comfortable and pleasant completion of the SPA-correction procedure with wax. Disinfects, retains moisture, nourishes, prevents hair ingrowth and leaves a pleasant fragrance. Lavender and coconut oil leave the skin moisturized, velvety and smooth. Menthol suppresses the burning sensation. The composition of natural fragrant oils leaves a pleasant impression after the treatment. Easily removes wax residues from the skin.

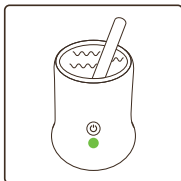

4

Wax solvent
BrowXenna®

Quick and efficient assistant for removing solid wax residues from clothes, textiles, tools, and equipment. **BrowXenna®** wax solvent leaves a pleasant citrus fragrance and helps to clean quickly after treatment.

INSTRUCTIONS

1. Heat a small amount of wax in a special heater to a creamy consistency.

2. Clean the area of the eyebrows from makeup and dirt with **BrowXenna® PRE-WAXING LOTION**.

3. Apply a small amount of **BrowXenna® PRE-WAXING OIL** with a cotton pad. Thoroughly remove excess oil with a paper napkin.

4. Use the applicator to spread the melted wax over a small area of skin regardless of the direction of hair growth. Lift the edge of the application so that it can be grabbed when the wax «solidify».

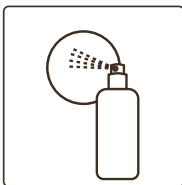

5. In 5-7 seconds, make sure the wax is frozen. Fix the skin in the tear-off area. Grasp the edge of the application and remove the wax with a sharp movement in the opposite direction to the application.

6. Repeat the procedure on the next skin area.

7. After the end of waxing, treat the skin with **BrowXenna® POST-WAXING OIL**. Do not wash off.

8. Remove residues of solid wax from tools and equipment with **BrowXenna® WAX SOLVENT**, if necessary.

Since 2013, we have been developing **BrowXenna®** products based on our expertise and the unique knowledge of the **BrowXenna® Team** — a community of hundreds of top eyebrow and eyelash trainers around the world.

As we create new products, we carefully consider the needs of beauty-specialists, top brow-bars, and their customers. We look ahead, anticipating market expectations. That's how we create innovative, unique and effective **BrowXenna®** products that have been gaining absolute recognition for 7 years.

In the development of the wax depilation system, we have sought to use the best technology for fast, safe and pleasant professional depilation of sensitive facial areas. That's why the **BROW WAXING SYSTEM** line has combined natural oils for a luxurious SPA effect and the best hypoallergenic wax with a perfect texture created in Italy.
